

THE COOL BLOCK

TEAM PURPOSE STATEMENT

EXAMPLES

- “Create a neighborhood where everyone knows your name and conservation is our game.”
- “We have come together as neighbors to lower our carbon footprint for the sake of our children's and the world's future and to create a more resilient neighborhood, prepared to help each other because we are socially connected.”
- “We are neighbors in action to boost community resiliency and sustainability, right here where we live.”
- “We are a group of neighbors who want to make a difference with growing community spirit by using and learning new ideas, creating a new beginning to help take more control of our part of the world.”
- “The word Mandala means "circle" and represents wholeness and a cosmic design, depicting our connection to life and infinity and beyond.

It is fitting to think that our Cool block plan resembles a circular pattern like the mandala, in that it encompasses the earth, our friends and family and communities, and the development of a state of mind that would ensure and prolong life.

We, in the Cool Block are doing just that by going through the processes by taking and practicing actions, step-by-step--reducing our Carbon Footprint, using materials wisely, re-using materials whenever and where we can and helping others attain other Cool Block goals.

It is our hope that we can come full-circle with our goals to make others join in to build a better life and world.”

- “Enhance community pride through action and neighborly interaction.”
